CARE-ABILITY is an Erasmus+ project that supports migrant women in building careers in the social and healthcare sectors. It responds to Europe's growing need for skilled caregivers while addressing barriers to education, training, and employment.

Objectives

- Deliver flexible, digital VET training for the care sector.
- Support personalised learning through AI-based tools.
- Validate skills with recognised micro-credentials.
- Reduce barriers to training and employment.
- Strengthen cooperation between VET providers, employers, and social organisations.

Key Project Results

CARE-ABILITY delivers practical, digital learning tools that build skills, confidence, and inclusion in the care sector. All results are freely accessible.

Training Programme: A modular training programme combining digital learning units, practical care skills, and inclusive teaching methods for migrant women and VET trainers.

Best Practices Handbook: A digital guide outlining approaches and resources to support the inclusion and professional development of migrant women.

AI Self-Assessment Tool: An AI-powered tool that helps users identify skills, training needs, and suitable learning pathways.

AI-driven Gamified Learning Tool: An interactive learning tool that uses AI and gamification to make training engaging, personalised, and effective.

Aim

To empower migrant women through accessible vocational training, recognised micro-credentials, and personalised learning pathways that support employability and social inclusion.

Target Groups

Migrant women, low-skilled or unemployed individuals, aspiring caregivers, VET learners and trainers, care sector employers, social organisations, and policymakers.

Building care careers for migrant women
